Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

- The primary reason for the allowance of claim 49 is the limitation of providing a spray dampening unit, operating said spray dampening unit over a period with a duration, providing a cylinder receiving said dampening agent from said spray dampening unit during said period, determining a characteristic of said cylinder, setting said duration of said period over which said spray dampening unit is operating in accordance with said cylinder characteristic, and applying said dampening agent to said cylinder in accordance with said setting for applying said dampening agent to said cylinder circumference in a complete dosage and starting at a same location on said circumference no earlier than at each third successive revolution of said cylinder, in combination with the other claim language.

The examiner interprets the language of claim 49, in particular the paragraph starting with "applying said dampening agent to said cylinder in accordance with said setting...", such that the cylinder receives the dampening agent from the spray unit starting at a particular point on the circumference of the cylinder. The cylinder then continues to receive the agent until a complete dosage has been received. No earlier than at each third successive revolution from the point on the circumference of the cylinder in which the cylinder began receiving the agent, the cylinder again begins to receive the agent at the same point on the circumference of the cylinder until a complete dosage is received.

- The primary reason for the allowance of claim 90 is the limitation of providing at least one spray nozzle, providing a roller, using said at least one spraying nozzle for applying said dampening agent to said roller, determining a characteristic of said roller, setting a spraying frequency of said spray nozzle as a function of said roller characteristic for avoiding overlaying of said sprayed-on dampening agent at least for a defined number of subsequent rotations of said roller, and selecting said defined number of subsequent rotations being at least two, in combination with the other claim language.

The examiner interprets the language of claim 90, in particular the paragraph starting with “setting a spraying frequency of said spray nozzle...”, such that the roller receives the dampening agent from the nozzle and the roller stops receiving the agent at a time that prevents the delivered agent from being laid on top of a previous layer of agent. Then, the roller begins receiving the agent from the nozzle again at least two subsequent rotations of the roller after the roller stops receiving the agent.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to KEVIN D. WILLIAMS whose telephone number is (571)272-2172. The examiner can normally be reached on Monday - Friday, 8:30am - 6:00pm.
